

SoDam Family Complete Guide

A step-by-step guide for people new to AI and computers

1. What Is SoDam Family?

SoDam Family is a collection of **6 plugins** that make **Claude Code** safer and easier to use — especially for Korean-speaking beginners.

Term	Plain Language
Claude Code	An AI coding assistant by Anthropic, run on your computer
Plugin	Like an app — adds features to a program already installed
Hook	An automatic safety check that runs just before Claude Code acts
CLAUDE.md	An instruction file telling Claude Code how to behave

2. Meet the 6 Siblings

SoDamHarness — Safety Guard (L0: Foundation)

Safety foundation for all siblings. Install this first.

Does: Confirms before risky commands · auto-backup · secret key warnings

SoDamContext — Doc Health-Check (L1: Middle)

Does: Scans CLAUDE.md for duplicates, contradictions, exposed secrets

Safety Rules:

- T1 : Never outputs secret values — shows only `sk-ant-...REDACTED`
- T8 : Lines with "never/must/secret/항상/금지" are never deleted, even if duplicated

SoDamLoop — Auto-Repeater (L2: Application)

Does: Repeats tasks automatically · maker/checker separation · stops after 8 iterations

SoDamAgentic — Planning Assistant (L2: Application)

Does: Creates plan before coding · summarizes changes in plain language

SoDamPrompt — Prompt Tools (L3: User)

Does: 10 fill-in-the-blank Korean AI prompt templates (SKILL.md format)

SoDamReverse — Reverse Analyzer (L3: User)

Does: Analyzes external code structure · injects Harness safety rules (advanced users)

3. Prerequisites

Node.js (Version 18+ Required)

1. Visit nodejs.org
2. Click **"LTS (Recommended)"**
3. Run installer → keep clicking "Next"
4. Restart computer after install
5. `node --version` → `v18.x.x` = success!

Claude Code

⚠️ *Paid service. Anthropic account and subscription required.*

1. Visit claude.ai/code
2. Download installer for your OS
3. Log in with Anthropic account

4. How to Download

ZIP Download (Recommended)

1. Visit GitHub address
2. Click green `<>` Code button
3. Click Download ZIP → unzip

Sibling	GitHub
 SoDamHarness	github.com/sodam-ai/SoDam-Harness-Eng
 SoDamContext	github.com/sodam-ai/SoDam-Context-Eng
 SoDamLoop	github.com/sodam-ai/SoDam-Loop-Eng
 SoDamAgentic	github.com/sodam-ai/SoDam-Agentic-Eng
 SoDamPrompt	github.com/sodam-ai/SoDam-Prompt-Eng
 SoDamReverse	github.com/sodam-ai/SoDam-Reverse-Eng

5. Installation by OS

⚠️ **Follow install order:** Harness → Loop → Context → Agentic → Prompt → Reverse

Windows

```
# Run PowerShell as Administrator

# SoDamHarness (Required)
New-Item -ItemType Directory -Force -Path "$env:USERPROFILE\.claude\plugins\sodam-harness"
xcopy /E /I /Y "C:\Users\%YourName%\Downloads\SoDam-Harness-Eng-main"
"$env:USERPROFILE\.claude\plugins\sodam-harness"
```

```
# SoDamContext (Optional)
New-Item -ItemType Directory -Force -Path "$env:USERPROFILE\.claude\plugins\sodam-context"
xcopy /E /I /Y "C:\Users\YourName\Downloads\SoDam-Context-Eng-main"
"$env:USERPROFILE\.claude\plugins\sodam-context"

# SoDamPrompt (Optional - SKILL.md format)
New-Item -ItemType Directory -Force -Path "$env:USERPROFILE\.claude\skills"
xcopy /E /I /Y "C:\Users\YourName\Downloads\SoDam-Prompt-Eng-main\skills"
"$env:USERPROFILE\.claude\skills"
```

Mac / Linux

```
# SoDamHarness (Required)
mkdir -p ~/.claude/plugins/sodam-harness
cp -r ~/Downloads/SoDam-Harness-Eng-main/* ~/.claude/plugins/sodam-harness/

# SoDamContext (Optional)
mkdir -p ~/.claude/plugins/sodam-context
cp -r ~/Downloads/SoDam-Context-Eng-main/* ~/.claude/plugins/sodam-context/

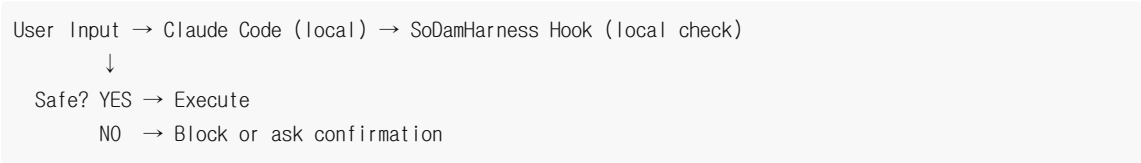

# SoDamPrompt (Optional)
mkdir -p ~/.claude/skills
cp -r ~/Downloads/SoDam-Prompt-Eng-main/skills/* ~/.claude/skills/
```

Verify

1. Fully close and reopen Claude Code
2. Type `/sodam-harness-status`
3.  Korean status message = success!

6. Security, Privacy & Data Flow

Data Flow

100% local operation — no data is ever sent to external servers.

Security Summary

Item	Detail
Secret key protection	Never output values; only sk-ant-...REDACTED shown
Personal data	No name, email, phone, or PII collected
Network	100% local after initial download
Fail-Closed	Error occurs → deny (never allow)

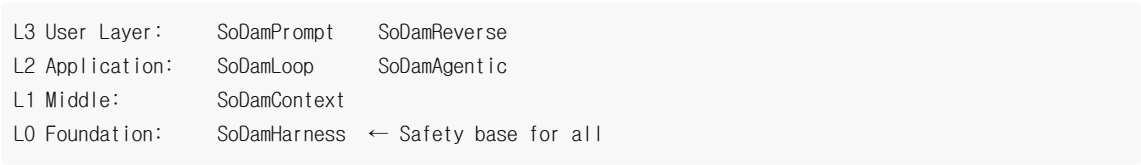

What SoDam Family Cannot Prevent

- Files deleted directly via File Explorer (bypassing Claude Code)
- User manually clicked "Allow" on a dangerous action
- Bugs in Claude Code itself
- Other siblings installed without SoDamHarness

Safety tool but cannot prevent 100% of accidents. Keep separate backups of important files.

7. Architecture

Layer Diagram

Dependencies flow upward only (one-way). Lower layers never reference upper layers.

8. Workflows

First-Time Setup Check

1. `/sodam-harness-status` → Check Harness status
2. `/sodam-context-checkup` → Run CLAUDE.md health check
3. Issues found: `/sodam-context-treat` → Preview → confirm → apply

Starting a Coding Task

1. `/sodam-agentic-start` → Begin onboarding
2. `/sodam-agentic-plan` → Create plan before coding
3. Give Claude Code instructions
4. `/sodam-agentic-review` → Review changes in plain language
5. Problem? `/sodam-harness-undo` → Roll back

Using Prompt Tools

1. Type `/독후감-도우미`
2. Fill in the blanks
3. AI generates complete draft

9. Command Reference

SoDamContext Commands

/sodam-context-checkup

- **Purpose:** Health check CLAUDE.md
- **Checks:** Duplicate lines, contradictions, exposed secrets, file size
- **Output:** Issue list and recommended fixes

/sodam-context-intake

- **Purpose:** Register new CLAUDE.md for monitoring
- **When:** Starting a new project

/sodam-context-treat

- **Purpose:** Apply prescribed fixes
- **Behavior:** Preview first → confirm → apply
- **Guarantee:** T8 — safety keyword lines are never deleted

SoDamPrompt Commands

Command	What to Fill In
/독후감-도우미	Book title, author, impressions
/정중한-메시지	Recipient, request, relationship
/긴급-3줄요약	Paste text to summarize
/설명-설명해줘	Topic, target audience
/공부-계획표	Study topic, target date, daily time
/자기소개-다듬기	Paste current self-introduction
/sns-캡션	Photo situation, mood, hashtag keywords
/영어-자연스럽게	English text, context
/발표-대본	Topic, duration, audience
/부탁-사과-메시지	Situation, request/apology content

10. File & Document Locations

OS	Plugin Path
Windows	C:\Users\YourName\W.claude\plugins\
Mac/Linux	~/.claude/plugins/

```
~/.claude/plugins/
├── sodam-harness/ (SoDamHarness)
├── sodam-context/ (SoDamContext)
├── sodam-loop/ (SoDamLoop)
```

|—— sodam-agentic/ (SoDamAgentic)
|—— sodam-reverse/ (optional)

~/.claude/skills/ (SoDamPrompt - SKILL.md format)
~/.sodam/backups/ (Harness auto-backup storage)

11. Troubleshooting

Symptom	Cause	Solution
Command not found	Claude Code not restarted / wrong path	Fully close & reopen, or reinstall to correct path
node --version error	Node.js not installed	Reinstall LTS from nodejs.org + restart computer
Repeated confirmations	Harness normal operation	Click "Allow" for verified safe actions
Secret key found	Key exposed in CLAUDE.md	/sodam-context-treat → move to .env → revoke if on GitHub
Loop won't stop	Loop runaway	/sodam-loop-stop → force-quit if needed

12. FAQ

Q. Can I install just one sibling? A. Yes. SoDamHarness alone is sufficient. Install others as needed.

Q. Safe for a work computer? A. 100% local — no data leaves your machine. Check company IT policy.

Q. Works offline? A. After initial download, 100% offline operation.

Q. How to update? A. Download latest from GitHub and reinstall the same way.

Q. Path with special characters OK? A. English-only paths recommended for best compatibility.

13. License, Copyright & Commercial Use

Apache License 2.0 Permissions

Action	Allowed?	Conditions
Personal use	✔ Unlimited	None
Educational use	✔ Fully allowed	None
Commercial inclusion	✔ Allowed	4 conditions
Modification + distribution	✔ Allowed	4 conditions

4 Required Conditions for Commercial Use / Redistribution

- ① **Include LICENSE file** — Must include original `LICENSE` file in your distribution.
- ② **Include NOTICE file** — If original `NOTICE` file exists, must be included.
- ③ **State changes made** — If you modified source code, state "This file has been modified."
- ④ **Retain copyright notices** — Do not remove `Copyright © 2026 SoDam AI Studio`.
