

SoDam Family

A collection of Korean-language Claude Code plugins for people new to AI, computers, and coding

License: Apache-2.0 | Version: 0.1.0 | Language: Korean | Platform: Claude Code

What Is This?

SoDam Family is a bundle of **6 plugins** that make **Claude Code** (an AI coding assistant by Anthropic) safer and easier to use — designed especially for Korean-speaking beginners.

Simple explanation for first-timers

- **Claude Code:** An AI coding assistant you run on your computer (made by Anthropic)
- **Plugin:** Like an app for your phone — it adds new features to Claude Code
- **SoDam Family:** Six plugins for "safety · health-check · auto-repeat · planning · prompts · analysis"

Meet the 6 Siblings

Name	Nickname	What It Does	Required?
 SoDamHarness	Safety Guard	Blocks dangerous commands, backup, undo	Required (install first)
 SoDamContext	Doc Health-Check	Health-check and fix your AI instruction file	Optional
 SoDamLoop	Auto-Repeater	Automatically repeats scheduled tasks	Optional
 SoDamAgentic	Planning Assistant	Plan first before coding; plain-language review	Optional
 SoDamPrompt	Prompt Tools	10 fill-in-the-blank Korean AI prompt templates	Optional
 SoDamReverse	Reverse Analyzer	Analyzes external code/app structure (advanced)	Optional

 **Always install SoDamHarness before the other siblings.** The others depend on it.

Prerequisites

Item	Version	How to Check	Download
Node.js	18 or higher	<code>node --version</code> in terminal	nodejs.org → LTS version
Claude Code	Latest	<code>claude --version</code>	claude.ai/code
Internet	—	Only for initial install	—

What is a terminal?

- Windows: Press `Windows key` , search `PowerShell` , press `Enter`
- Mac: Press `Command(⌘) + Space` , search `Terminal` , press `Enter`

Installing Node.js (First-timers)

- Visit `nodejs.org`
- Click **"LTS (Recommended)"** download button
- Run the downloaded file → keep clicking "Next"
- After install, type `node --version` in terminal
- If you see `v18.x.x` — success!

How to Download

Option 1: ZIP Download (Recommended for Beginners)

- Go to the sibling's GitHub address
- Click the green `< > Code` button
- Click `Download ZIP`
- Unzip the downloaded file

Sibling	GitHub Address
 SoDamHarness	github.com/sodam-ai/SoDam-Harness-Eng
 SoDamContext	github.com/sodam-ai/SoDam-Context-Eng
 SoDamLoop	github.com/sodam-ai/SoDam-Loop-Eng
 SoDamAgentic	github.com/sodam-ai/SoDam-Agentic-Eng
 SoDamPrompt	github.com/sodam-ai/SoDam-Prompt-Eng
 SoDamReverse	github.com/sodam-ai/SoDam-Reverse-Eng

Installation

Follow install order: `Harness` → `Loop` → `Context` → `Agentic` → `Prompt` → `Reverse`

Step 1: Install SoDamHarness (Required)

Windows:

```
xcopy /E /I "SoDam-Harness-Eng" "%USERPROFILE%\\.claude\plugins\sodam-harness"
```

Mac / Linux:

```
cp -r SoDam-Harness-Eng ~/.claude/plugins/sodam-harness
```

Step 2: Restart Claude Code

Fully close Claude Code, then reopen it.

Step 3: Verify

Type `/sodam-harness-status` in Claude Code.  Korean status message = installation succeeded!

Quick Start

```
/sodam-harness-status
```

Check that Harness is running.

```
/sodam-context-checkup
```

Health-check your AI instruction file (CLAUDE.md).

```
/sodam-agentic-start
```

Start the planning assistant.

Command Reference

SoDamHarness

Command	Description
/sodam-harness-status	Check current status
/sodam-harness-undo	Undo the last action
/sodam-harness-fix	Attempt automatic fix

SoDamContext

Command	Description
/sodam-context-checkup	Health-check AI instruction file
/sodam-context-intake	Register new AI instruction file
/sodam-context-treat	Apply discovered fixes

SoDamLoop

Command	Description
/sodam-loop-start	Start auto-repeat task
/sodam-loop-stop	Stop the loop

SoDamAgentic

Command	Description
/sodam-agentic-start	Start onboarding
/sodam-agentic-plan	Plan before coding

/sodam-agentic-review	Review changes in plain language
-----------------------	----------------------------------

 SoDamPrompt

Command	Description
/독후감-도우미	Book report helper
/정중한-메시지	Polite message writer
/긴글-3줄요약	Summarize in 3 lines
/쉽게-설명해줘	Explain simply
/공부-계획표	Study schedule maker
/자기소개-다듬기	Polish self-introduction
/sns-캡션	Write SNS captions
/영어-자연스럽게	Natural English writer
/발표-대본	Presentation script
/부탁-사과-메시지	Request/apology message

Security & Privacy

-  **100% local** — No data sent to external servers
-  **Secrets never exposed** — API keys shown as `sk-ant-...REDACTED` only
-  **Dangerous actions blocked** — Irreversible actions require confirmation
-  **No personal data collected** — No name, email, phone, or PII
-  **Auto-backup** — Important files backed up before modification
-  **Not 100% accident-proof** — Safety tool but cannot prevent all scenarios

License

All 6 SoDam siblings use **Apache License 2.0**.

What You CAN Do

Use Case	Allowed?
Personal use	 Fully allowed
Commercial use	 Allowed (conditions apply)
Modification	 Allowed (must indicate changes)
Redistribution	 Allowed (must include LICENSE + NOTICE)

What You CANNOT Do

Item	Explanation
Trademark misuse	Cannot use "SoDam AI Studio" to endorse your product
Warranty claims	Cannot claim developers guarantee this software
Liability transfer	Cannot hold developers liable for damages

Required for Commercial Use

1. Include original `LICENSE` file in your distribution
2. Include original `NOTICE` file in your distribution
3. If modified, state "This file has been modified"

Troubleshooting

Symptom	Solution
Command not visible	Restart Claude Code
<code>node --version</code> error	Reinstall Node.js LTS
Too many prompts	See GUIDE.en.pdf §11 FAQ
Where are backups?	Check <code>~/ .sodam/backups/</code>

Undo not working

Type /sodam-harness-undo

SoDam Family is built so that non-developers and complete beginners can use AI safely and easily.
